Languages

English - C1

Hobby/Interest

Good movies,
Fantasy books,
Gaming

I am a universal programmer - I feel good both as a front-end and back-end developer. The studies allowed me to learn more about the functioning of application servers, focusing mainly on the Java language. In turn, my work so far has allowed me to spread my wings as a developer of web and mobile applications. I am constantly trying to develop by deepening my knowledge and learning about new technologies. In my spare time, I test my skills by creating smaller projects.

Work History

2021-07

- present
